## January inflation slows; March rate cut seen

Inflation slowed to below four percent in the first time in more than a year, following hopes that the Bangko Sentral ng Pilipinas (BSP) will deliver a modest growth push in its March 1 meeting to double disinflation to the three-digit domain.

Annual inflation in January slowed to 3.9 percent, down from the previous month's rate of 4.2 percent, down from a year-ago reading of 5.04 percent.

"This suggests we view the inflation rate as more manageable over the policy horizon, and allows us continue to have policy space should inflationary pressure develop," BSP Governor Andres B. Domingo said in a weekly brief to the public.

The annual food inflation (January) inflation fell to 3.3 percent and 4.2 percent.

"However, it also said, the central bank was watching developments continue and closely.

## PCCI backs Tampakan project

By RICHARD L. LO

The Philippine Chamber of Commerce and Industry (PCCI) supports the Tampakan copper-gold mine, according to PCCI president Miguel Tan. The business chamber will also support the mine with its lobbying efforts.

"According to us, the Tampakan project is an investment the government must not ignore," Tan said. "The PCCI could not support the Tampakan project if the government does not support it."

Tan said the PCCI is supporting the Tampakan project as it is a project that will bring in foreign investment and create jobs for the local community.

# Weapons of mass distraction

PHOTOGRAPH BY [unreadable]

**JUST what arouse powers does this part of the female anatomy have over the male will that will cause them to stare (unintentionally or advertently) at them and risk debasing bodily aims?**

It's a question that has been asked in many guises, from the most subtle to the most blatant. The answer, of course, is that it's the female anatomy that has the power to distract the male will. This is a fact that has been known for centuries, and it's one that has been used to justify many of the most outrageous and degrading acts of sexual violence against women.

But what if we asked a different question: What if we asked the female anatomy to be a weapon of mass distraction? What if we asked it to be a weapon that could be used to distract the male will from its own desires and to focus it on something else? What if we asked it to be a weapon that could be used to distract the male will from its own desires and to focus it on something else?
